Statement of Gloria Allred Regarding CT Legislature Request for Public Hearings

We would gladly participate in any public hearing that the Connecticut legislature may wish to conduct concerning the University of Connecticut's failure to protect UConn students from sexual assaults and rapes and the University's failures to respond appropriately as required by Title IX to reported sexual assaults.

We believe that the University has not done enough to protect its female students. We agree with state legislators who have called for public hearings and who have said, "All complaints of sexual assaults need to be treated seriously and investigated and victims deserve to be treated with respect and dignity."
